# FutureDial SMART Test™ Robots Functionally Test Over 4 Million Mobile Devices Worldwide for Resale

*Wireless Carriers, Third-Party Logistics Providers (3PLs) and Mobile Device Recyclers use FutureDial's SMART Test™ robot to functionally test greater volume of pre-owned mobile devices being traded-in*

**SUNNYVALE, CA — Jan 25, 2021** — FutureDial, the leading provider-of-choice of mobile device processing solutions for Wireless Carriers, Mobile Device Buy-Back & Trade-In Companies, Mobile Device Recyclers and Third-Party Logistics Providers (3PLs), announced today that its SMART Test™ robots have been used by customers to functionally test over 4 Million pre-owned Android and iOS-based mobile devices worldwide, for later resale on secondary markets. In 2020 alone, despite COVID workplace restrictions at customer operation centers, FutureDial's SMART Test™ robots enabled customers to test and process over 2 million mobile phones.

## ***The Most Robots Deployed for Automated Phone Testing***

FutureDial has the most robots in the industry that are deployed at mobile phone supply chain processing centers and warehouses of mobile device reverse logistics operators and wireless carriers, and these robots help to scale and automate customers' labor-intensive processing operations.

## ***Maintaining High Volumes of Testing on the Operations Floor***

"Surpassing 4 Million mobile phones being functionally tested with our Smart Test™ robots marks a huge achievement for us here at FutureDial," noted Steve Manning, FutureDial's Chief Strategy Officer. "FutureDial has the largest deployment of robotic testing solutions worldwide among customers on the operations floor. Despite COVID workplace restrictions which have impacted our customers' operations, our robotic solutions like SMART Test™ continue to have a tremendous impact in the daily operations and the process flow for large-volume operation centers who process pre-owned mobile devices for the supply chain."
